

## DAY 2, PART 2: WARMTH

---

### 1. Start your home blackout bin

Put everything that would be useful in the event the power or other utilities stop working into a bin. Store it somewhere safe but accessible. Store extra items that don't fit into the bin (like spare blankets) close by too. Take a picture and post it to the Facebook group!

### 2. What's in the bin?

Write down what you already have in your blackout bin:

Write down some items you would like to purchase to add to the bin. Highlight or star the important ones that you want to purchase ASAP.
